

## Defender Collection Software Encryption

This Encryption software offers your clients a fully compliant solution to their data security concerns. This product meets or exceeds all Government and Enterprise regulations for Encryption.

- Meets regulatory requirements for the Federal Information Processing Standardization ( FIPS) 140-2, Level 1 Validation representing a U.S. Government Security Standard that specifies cryptography module requirements for data encryption.
- The design and strength of the AES-256-bit software Encryption key protects your data-at-rest. The transformation of plain text into cipher text (Encryption) includes several processing steps quickly executed with the included software that operates when loaded on our USB drives.
- Establish an authentic password to create an identity on the Drive. By creating a strong password you increase the level of security protecting your data.
- Available in Capacities from 1 GB to 64 GB
- Compatible with Windows 7/Vista/XP and Mac OS \*9 or higher
- Simple to use just plug and play !

Ask about Defender Control Server which allows security and compliance leaders and network administrators to control, manage and audit the removable data storage devices used by their organizations, talk to your CSR Rep for further details.
